

readJson and writeJson Call Graphs

readJson — Call Graph

readJson Options

```
ReadJsonOptions = DeepCopyOpts & IStripComments & IAutoTemporal & IIncludeUrl
```

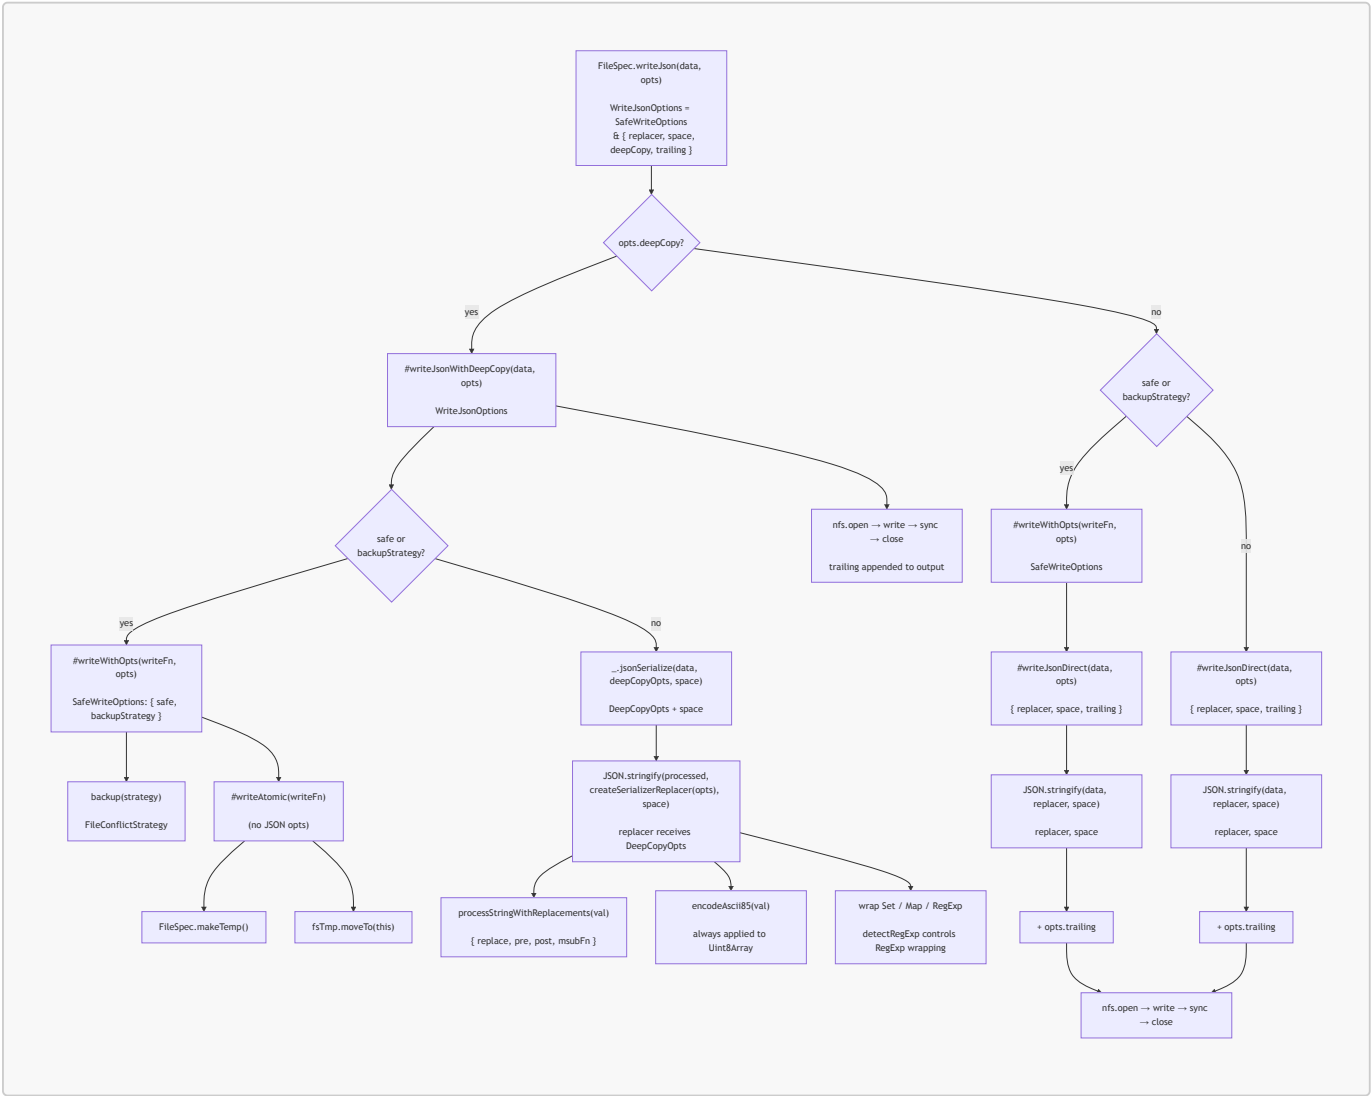

Option	Set	Type	Default	Consumed By
stripComments	IStripComments	boolean IStripJsonComments	—	stripJsonComments (via jsonDeserialize or direct)
autoTemporal	IAutoTemporal	boolean	—	createDeserializerReviver → asTemporal()
pre / post	DeepCopyOpts	string	—	processStringWithReplacements
replace	DeepCopyOpts	Record<string, string unknown>	—	processStringWithReplacements

Option	Set	Type	Default	Consumed By
msubFn	DeepCopyOpts	MSubFn	—	processStringWithReplacements
detectRegExp	DeepCopyOpts	boolean	—	#deepCopy → <code>_.asRegExp</code>
includeUrl	lIncludeUrl	unknown	—	#deepCopy (fs-level recursive read)

IStripJsonComments (nested under `stripComments`):

Sub-option	Type	Default	Purpose
whitespace	boolean	true	Preserve whitespace in comment positions
trailingCommas	boolean	false	Remove trailing commas before <code>}</code> / <code>]</code>

writeJson — Call Graph

writeJson Options

```
WriteJsonOptions = SafeWriteOptions & { replacer, space, deepCopy, trailing }
SafeWriteOptions = { safe, backupStrategy }
```

Option	Type	Default	Consumed By
replacer	JsonReplacer	—	JSON.stringify (direct path)
space	string Integer	—	_.jsonSerialize or JSON.stringify
deepCopy	DeepCopyOpts boolean	false	Routes to #writeJsonWithDeepCopy
trailing	string	—	Appended after final } before file write
safe	boolean	false	#writeWithOpts → #writeAtomic
backupStrategy	FileConflictStrategy	—	#writeWithOpts → backup()
